StoryTale

guides

Explore and discover unknown and unobvious locations recommended by local guides. Find Hemingway's favorite bar in Venice, trace the location of the Berlin Wall, and visit the sites of the key battles of the Warsaw Uprising.

- Your personal guide on your phone
- Anytime, anywhere, whenever you want
- Explore at your own pace
- Multimedia integration
- Voice-over narration and audio description
- Unlimited multimedia content
- Possibility of gamifying the exploration experience
- Accurate navigation and personalized maps
- Discount codes for visitors
- GPS, QR codes, NFC integration

games

Experience adventures in the real world. Defeat the dragon, get the treasure and free the princess. Solve criminal puzzles. Capture the spy. Engage in a lightsaber battle. Become a hero.

- Single or multiplayer game options
- Content personalization
- Unlimited number of players
- Reusable scenarios and unlimited concurrent users
- Worldwide accessibility
- Various puzzle formats
- Story-driven adventures
- Remote supervision and automated gameplay workflow
- User-friendly interface and service
- Multimedia integration
- Multilingual support
- GPS, QR codes, NFC integration

features

Storytelling

Each and every location offers several possibilities for unfolding the story. Starting from the entrance screen (intro), through location descriptions, challenge screens (appearing after player check-in), alternate, additional story options, and ending screens (outro). All of this enriches the player's experience and builds emotions based on the narrative, conducted within the location.

Challenges

We provide to the story designer many options to use i.e. 11 basic types of challenges built into the StoryTale app. They range from simple multiple-choice tests, open questions (with automatic correctness checking), arranging in order, matching A to B, code input or QR scan to picture puzzles or matching an image over the camera view on the phone to discover a solution.

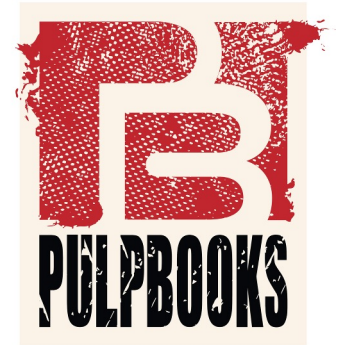

Multimedia

The general game screen and location screens can be enhanced with multimedia elements such as videos, animations, photos, illustrations and audio materials. Additionally, the intro and outro screens can be utilized as fullscreen videos that enhance the player's immersion in the game. There is also the possibility of incorporating 360-degree photos, allowing participants to explore the world of the game, showcase a specific location at a different time of day, or in a different historical era.

Location and Check-in

StoryTale app allows for player check-in confirmation in several ways, depending on the needs and configuration of a given location: without confirmation, GPS location, QR code, Bluetooth beacon, entering a location code, or interacting with IoT devices. Such a range of options ensures high flexibility and the ability to adapt to the storyline and technical capabilities available during gameplay.
